MediScribe

— A Smarter Way for Independent Practitioners to Grow

Team name: Team MediScribe
Team members: Prakhar Sharma (7994454919), Akhil KV (8848673275), Adithya B (8089283909)
Department: Computer Science Engineering
College: Rajadhani Institute of Engineering and Technology

NotebookLM

Independent and small-scale medical professionals lack the tools to organise, digitalize, and manage their practice efficiently. They rely on physical paperwork, scattered files, and fragmented tools — leading to lost records, wasted time, and reduced patient care quality.

MediScribe solves this by bringing everything into one simple, browser-based platform accessible from any personal device.

NotebookLM

Schedule and manage patient appointments

Search and retrieve reports, theses, and journal records using a simple text prompt

Store all patient and case data in one unified place for easy reference

Capture notes via Speech-to-Text, keyboard typing, or freehand doodle — like MS OneNote

NotebookLM

Frontend: TypeScript with Vite (fast, modern web interface)

Backend: Node.js with Express (server-side logic and API handling)

AI Integration: Google Gemini API (AI-powered document search and note generation)

Styling: CSS (custom interface design)

Deployment: Vercel (instant web hosting and delivery)

AI Search Scope: Gemini queries only within user-uploaded documents — guaranteeing reliable answers with zero hallucinations

NotebookLM

Our Advantages:

Time Saved — instant note capture and AI-powered history retrieval

Zero Lost Files — fully digital, no damaged or misplaced paperwork

Absolute Trust — AI answers only from uploaded documents, no hallucinations

Total Resilience — browser-based, no hospital software installation required

Existing Solutions Fall Short:

Tebra: Integration issues slow critical workflows.

Elation Health: Manual data copying just to generate a basic report.

athenahealth: Overcomplicated, built for large hospitals not independent doctors.

All platforms share one fatal flaw — server failures make patient data unreachable when it matters most.

NotebookLM

MediScribe gives every independent doctor what the big platforms never could — simplicity, reliability, and complete control over their practice, right in their browser.

Speak a note. Find a file. Schedule a patient. All in one place. All yours.

We are not just about efficiency — we are about saving time, saving lives, and building careers.

MediScribe. Simple. Reliable. Built for the way you actually work.
