Introduction

The Problem

Independent and small-scale medical professionals often lack the tools to organise, digitalize, and manage their practice on their own.

Our Solution

MediScribe helps doctors manage, digitalize, and organise their patient records, journal records, and clinic operations — all within their own personal electronic device.

How It Works

Multiple features packed into one versatile platform:

- Schedule meetings and appointments
- Efficiently search and retrieve data (reports, theses, journal records) with a simple prompt
-

-
- Store patient and case-related data in one place for easy reference
- Capture notes via Speech-to-Text, text typing, or doodle (like MS OneNote)

Tech Stack

NEED TO DO

Advantages

Doctors spend too much time on paperwork and not enough on patients.
We are changing that.

Time Saved: Speech-to-text and stylus inputs let doctors instantly generate notes and retrieve patient histories.

Zero Lost Files: Fully digital workflows eliminate the risk of damaged or misplaced paperwork.

Absolute Trust: Searches strictly within uploaded documents — guaranteeing 100% reliable answers with zero AI hallucinations.

Total Resilience: Operates flawlessly offline, completely bypassing hospital network drops.

Existing Solutions Fall Short

Today's tools were designed for large institutions — and it shows.

Tebra: Struggles with integration and usability issues that slow down workflows at critical moments.

Elation Health: Leaves doctors manually copying data just to generate a basic report.

athenahealth: Overcomplicated — feels like a hospital command center when all you need is a simple tool.

All platforms: Server and client failures mean critical patient information is unreachable — and in medicine, time is never something you can afford to lose.

MediScribe

Speak a note. Find a file. Schedule a patient.
All in one place. All offline. All yours.

We're not just about efficiency...
We're about saving time. We're about saving lives. We're about building careers.

Simple. Reliable. Built for the way you actually work.
